

LONG YEARS AGO

April 22, 1944

The School Board is calling for tenders for the erection of a picket fence around the school property.

The implement man of this town are kept busy these days setting up machinery. By the number turned out this spring the crop put in should be double that of last year.

Seeding in this district is almost completed. Excellent weather of late has been a big help to farmers.

A train consisting of two engines and 25 cars of settlers came through Didsbury Sunday. Five settlers stayed here, the balance going further north.

A prairie fire was burning about 24 miles east of here this week and some ranchers were burned out.

WESTCOTT NEWS NOTES

Mrs. O.T. Swaby had an unusual accident last Wednesday while attending customers at the store. She tripped and fell, and in so doing she became unconscious. We are glad to report that except for bruising she seems quite well again.

Mr. and Mrs. Wm. Daunty and Gwendolyn of Westcott were out to the Westcott district on Friday last, calling on Mr. and Mrs. Roib.

We were pleased to hear that Mr. and Mrs. Fred Goethen were able to bring their baby daughter home from the Didsbury hospital on Saturday, when she had been sick but a month ago.

Miss Alice Olsen of Calgary spent Sunday afternoon at the H. Goethen home.

We are sorry to hear that Mrs. Bradley, mother of Mrs. L. Sander- son, became quite ill over the week end and is confined to bed.

Mr. Wilbert Borscht of Elton is here this week running Mr. Herb Goethen's combing shop.

With the fine weather of the past weeks threshing seems to be completed, but there still is the occasional combine here and there. However, that too will soon be finished. Many farmers are busy preparing fields for sowing and the work is progressing rapidly.

Pupils and teacher alike are enjoying the holiday. Mrs. Trussell left for Calgary last Thursday evening.

Mr. Ted Duford, who attends school in Calgary, is home for the holiday.

GOOD SHOW AT RUGBY HALL

Threshing and combining seem to be the order of the day in this community and there was not a very large crowd at the picture show, which was put on by the National Film Board in the Hall Tuesday evening at 8:30 p.m. The shows were very good, especially those of Newfoundland, and the ones on Canadian Wild Life. Those who were not present certainly missed a very nice evening's entertainment.

Other pictures are expected to be shown at a later date.

MRS. W.E. STILES TO SPEAK
OVER CFCN 11.18 P.M. MAY 1

Owing to daylight saving time, the radio talk "Mother's Business" to be given by Mrs. W.E. Stiles of Didsbury will be heard one hour earlier over Radio Station CFcn on Wednesday, May 1, and the new time of the broadcast is 1:18 p.m. on May 1.

A collection was taken up around the hall to raise money for the purchase of baseball equipment and the following donations were received:

Allen Gole \$1; Frank Kaufman \$2; Nick Nowak \$2; Fred Reiffen-berg \$1; Vern Sutton \$1; Art Ester

\$1; H. McCullough \$1; Arnold Shantz

RECEPTION HELD FOR TWO
LOCAL WAR BRIDES

The senior and junior groups of the Women's Ass'n and the Women's United Missionary Society of Knox United Church held a reception for the two young brides, Jack and

Mrs. Donald Smith, Wednesday evening, April 17, at the home of Mrs. Ruth Eckel. Twenty-five guests were present.

On arrival the guests of honor were presented with corsages of violets. Mrs. Bruce Parker gave a very witty address to the brides.

Mr. Harry Ward presented each with a wool bed.

Mrs. Reid Clarke gave a humorous reading. A contest "The Bride's Kitchen" was held and Mrs. James Thompson was the winner.

Mrs. Norman Clarke poured tea and lunch was served by the members.

BERGEN NEWS NOTES

Leonard Meekelborg and family spent the weekend end in Calgary.

Lena Svees visited her parents and friends here this week.

John Gamble spent a few days last week visiting at home.

Wm. Gamble and wife are here on a visit before locating a residence.

James Davidson sold the Ten-

Meekelborg place to Leonard Meekelborg. Leonard sold the east half of the Johnson place to Albert Johnson.

Elsworth Weber has sold his home

near the Red Deer Valley school.

Joe Erickson is out of the hospital and has work in Calgary.

Mr. and Mrs. Dave Brownfield, Mrs. Ruby Wideman and Esther Olson spent a few days in Three Hills attending a convention.

Mrs. Oscar Shupe of Calgary is visiting her son Mr. Wayne Shupe and Denis of Hartmann.

NEW MAN FOR SANITATION

Charlie Austin of Olds has again been appointed the Sanitation man for the Town of Didsbury and commenced his duties Tuesday of this week. Charlie got the job for a couple of months last summer and left when he could not find suitable living quarters.

TOM MORRIS IS THE
PRESIDENT OF THE
SENIOR BALL CLUB

At the meeting of those interested in senior baseball, held in Didsbury on April 26, the following officers were elected:

President, Tom Morris;
Vice-President, Vern Sutton;
Playing Coach, Jimmy Goekzin;
Assistant Coach, Harold Wood;
Secretary, Fred Evans.

George Law was appointed representative to attend the executive meeting to be held at Olds on April 27, and the schedule of play in an interview follows:

A collection was taken up around the hall to raise money for the purchase of baseball equipment and the following donations were received:

RECEPTION HELD FOR TWO
LOCAL WAR BRIDES

The senior and junior groups of the Women's Ass'n and the Women's United Missionary Society of Knox United Church held a reception for the two young brides, Jack and

Mrs. Donald Smith, Wednesday evening, April 17, at the home of Mrs. Ruth Eckel. Twenty-five guests were present.

On arrival the guests of honor were presented with corsages of violets. Mrs. Bruce Parker gave a very witty address to the brides.

Mr. Harry Ward presented each with a wool bed.

Mrs. Reid Clarke gave a humorous reading. A contest "The Bride's Kitchen" was held and Mrs. James Thompson was the winner.

Mrs. Norman Clarke poured tea and lunch was served by the members.

The ball was beautifully decorated with daffodils and branches of flowering shrubs. After a short program the stage was set as an Emigration Office in Liverpool. Mrs. Parker served as the manager of the office, assisted by two other officials, and called for Mrs. Muriel Farrant for examination, etc. The questions asked the bride caused much merriment. Then came the moment when her baggage had to be examined. The assistants brought in a large trunk filled with a variety of lovely gifts.

Lunch was served at a number of small tables, the bride's table being covered with a lace cloth and centered with silver candlesticks and flowers in silver vases.

Both the bride and Ted thanked all present in short appropriate speeches and all agreed a most pleasant evening had been spent.

PROTEST MEETING AT RUGBY
HALL WED. MAY 1 8:30 P.M.

J. C. Flippin, provincial president of the Alberta Farmers Union will address a protest meeting at Rugby Hall on Wednesday, May 1, at 8:30 p.m. Subject will be "Income Tax and Other Urgent Farm Problems". All farmers are urged to attend.

NOTES FROM THE WEST

A farewell party was held at Guelph for Mr. and Mrs. Clark Goetz, who are leaving to make their home in Cartwright. We wish them real happiness in their new home.

Mr. and Mrs. A.L. Hogg were in Calgary Saturday to meet their son LA Colin Hogg, who returned on the 5th of April and stayed over in Winnipeg to get his discharge.

The Elton Willing Workers met at the home of Mrs. Hogg on Wednesday evening. The articles for the baby's layette to go overseas were all turned in and it will be sent on. Next month the parcel will be packed for a civilian overseas who had entertained one of our boys. Disraeli, who often stays having no permanent home and a companion was enlisted to meet the Rugby ladies with the view to joining them in a social evening for this purpose.

The next meeting will be at the home of Mrs. Ken Barnes, May 8.

Mrs. G. Birt and two little boys are spending the Easter vacation in her parents' home. Mr. and Mrs. Dodson are at Sundre.

A good crowd gathered at the Rugby Hall Tuesday of last week to see the free picture show put on by the Alberta government and sponsored by the Rugby W.I. It was voted as being really worthwhile and it is hoped to have another one.

Mr. Jean Belmer of the CWAC is on his way home on the Ile de France. Jean married overseas and will visit with his husband's parents in Quebec before returning to his home at Elton.

SHOWER AT ROSEDALE B.C.
FOR MRS. TED FARRANT

Mrs. Hilda Farrant of Rosedale, B.C. has sent in the following account of a shower held recently at Rosedale, B.C., for Mrs. Ted Farrant:

The Parish Hall at Rosedale, B.C. was well filled on Friday evening with friends gathered to welcome "the bride" Mrs. Ted Farrant, a British bride who arrived two weeks ago.

The hall was beautifully decorated with daffodils and branches of flowering shrubs. After a short program the stage was set as an Emigration Office in Liverpool. Mrs. Parker served as the manager of the office, assisted by two other officials, and called for Mrs. Muriel Farrant for examination, etc. The questions asked the bride caused much merriment. Then came the moment when her baggage had to be examined.

The assistants brought in a large trunk filled with a variety of lovely gifts.

Lunch was served at a number of small tables, the bride's table being covered with a lace cloth and centered with silver candlesticks and flowers in silver vases.

Both the bride and Ted thanked all present in short appropriate speeches and all agreed a most pleasant evening had been spent.

**WORLD HAPPENINGS
BRIEFLY TOLD**

Reports compiled in Rome state that 22,000,000 persons died during the war. Vatican radio said.

Application has been made for construction of a \$1625,000 (\$2,812,500) penicillin factory in Glasgow.

The Plohrreich society of Scotland helped train 93 Canadian army drivers during the war, in courses given at Edinburgh Castle.

About 1,400 horses of a possible total of 20,000 expected to be shipped to France during 1946 have left Canada since the start of the year.

Five Welsh ports—Cardiff, Newport, Swansea, Port Talbot and Barry—are seeking the export trade formerly handled by Hamburg, Germany.

German prisoners will be used as port cleaners and other agricultural jobs on British railroads to relieve the manpower shortage.

Britain has 2,153,000 telephones in use, with annual call totaling 1430-million. Bath telephones and radios are controlled by the postal department in that country.

The Ace of Spades roadhouse in London, requisitioned for the Royal Canadian Navy during the war, is for sale. It has club facilities, a barroom, restaurant and cafe.

Production of steel ingots in February totaled 291,273 tons compared with 236,607 in January and 235,562 in February 1945, the Dominion Bureau of Statistics reported.

**GARDEN
NOTES**
Back Savers

While one can garden satisfactorily with a minimum of tools, there is no guarantee that the job will be made easier and easier with a little more equipment. Three to five strong cultivators will do about three times the work with the same effort, and a long-handled spade or fork will save the back in digging. Then again there are special implements for irrigation which are found faster than the ordinary kind for light weeding, and a long-handled spudger will get down deep and other weeds out of the soil without the back straining. With all implements, from the simplest to the most complicated, big dividends in labor saved, are paid by having cutting edges clean and sharp. An old adage will do the trick with tools and spades.

The Early Ones

First vegetables and flowers that are planted are those which seeds must be sown early. These will stand quite a lot and even a heavy snowfall or a week's return of winter after planting will not hurt them. Such plants are usually in this category. Both of them must get their first growth while the weather is cool and moist, otherwise they won't develop well and won't stand up through the hot weather. Grass is in the same class. One can hardly get the new lawn or the annual patches of established lawns to grow well if the ground is not tilled so that the soil is thoroughly prepared and the ground level before the seed is sown. This last caution particularly applies to lawns, as the grass grows quickly.

Other early vegetables that will stand some tough weather are spinach, radish and lettuce. Among the flowers are cosmos, marigolds, zinnias, asters, petunias, poppies, daisies, any of the penstemons, nursery stock, etc.

How To Grow Tender Vegetables

Unhurried growth is the real secret of tender vegetables. Chip tomatoes, beans, corn, peas and similar things without stringers or tough cores come from gardens where growth has been hurried along, unchecked by weather or other physical conditions. The weather is not too favorable, experienced gardeners can produce this sort of quality.

First they keep the soil well cultivated both to keep it moist and to encourage quick development in dry weather. They thin these vegetables which need sparing in order that each plant may have enough space and equipment. They harvested vegetables when they are at their best, just the right size for eating and before they start to harden and mature.

Secondly, they keep a fresh supply coming in all through the season by making plantings ten days to two weeks apart right up to the 1st of October. In this way the gardener can afford to sow all seed on a single afternoon. Carrots, beans, beets and many other vegetables can be planted successively and will continue to come in for eight weeks in almost every part of Canada. It stands out in this way, the harvest is extended equally if not more so. To extend the season still further one can use early medium and late varieties. Nowadays a few days of frost on fresh peas or corn is not enough one can have that sort of luxury for weeks on end.

BRITISH INVENTION

LONDON—One of Britain's latest inventions is a Braille reading meter for the rehabilitation of blinded ex-servicemen in certain industries. The instrument will enable former skilled tool and instrument makers to carry on with their normal work.

HANDLES ONE OF FEW SIBERIAN DOG TEAMS IN CANADA.—Siberian dog team is expertly handled by Mrs. W. R. "Bob" Commins of Manitoulin Islands. Dressed in a caribou parka, just as if spring was still around the corner, Mrs. Commins is shown with Bonanza, the leader of the team.

Millions For Relief
Fund For War-Stricken Populations

Canadian Red Cross in conjunction with the Canadian United Allied Relief Fund, proposes to expand in 1946 some \$20,000,000 of its remaining war funds on relief supplies for war-stricken populations in Europe and China and in addition will allocate large amounts of supplies on hand to countries which have suffered from natural catastrophes for the same purpose. Commitments against this 1946 allocation are already underway.

Officials at the National Headquarters of the Society making this announcement referred to despatches received from overseas representatives stating that suffering in Europe and China due to the war had reached extreme proportions and called for additional appropriations and for every possible assistance.

Considerable expenditures from available funds and the distribution of large quantities of supplies on hand are also planned for relief in Britain, Italy, France, Greece, Turkey, Australia, New Zealand, South Africa, and the Far East.

Purchases of relief goods, principally clothing and medical supplies, totalling some \$9,000,000 covering commitments on behalf of the Canadian United Allied Relief Fund for the year 1945 have now been completed, the value of the goods shipped. In addition to the sum approximately \$2,000,000 worth of Red Cross made-up supplies, it was estimated, had also been despatched to European countries and for use in Britain.

Relief goods consigned to Belgium, France, Italy, Greece, Holland, Norway, Yugoslavia, China, Denmark, Luxembourg, Poland and Russia in 1945 were packed in over 70,500 cases and carried on 80 steamships.

Committees of each of the above countries collaborated with the Red Cross in the selection and purchase of goods most needed in the individual countries concerned and involved many hundreds of different items.

Among these items were 51,453,000 units of penicillin, 24,275,000 suits blankets, 10,000 tons of food, 1,147,250 garments purchased from the War Assets Corporation, 52 complete Operating-Room sets costing \$12,500 each, 124 ambulances, and 295,000 pairs of shoes purchased from the War Assets Corporation and the Department of National Defence.

Postage Stamps
Free India Stamps Were Printed By The Japanese

London philatelists believe they have solved the riddle of who issued a series of nine Free India postage stamps.

British troops found the stamps in a building near the hands of the Irrawaddy. They were all adequately colored, produced by a photogravure process, and included the words "All India" ("Free India").

The stamps varied in value from half an anna to 12 annas and six of them carried a surtax. Seven of the stamps depicted Indian scenes while the other two showed a map of India with a broken chain across it.

There was no evidence that any were ever sold at post offices. The undated, undenominated, the stamps were issued on Bahadur Chandra Bose, Indian left-wing politician and leader until his death in a plane crash of the so-called Indian National Army. The stamps were printed in Burma under the auspices of the Japanese who planned to use them for their victory in India, but the Japanese campaign failed and the stamps were never used.

In Rockford, Ill., the tombstone of Criminal Lawyer John Goemel bore the straightforward inscription: "The Defence Rests."

Not Uncommon
Destructive Tidal Waves Are Often Experienced In The Pacific

Destructive waves such as struck Hawaii in November points are commonly called "tidal waves" although they are properly seismic waves since they have their origin not in tides, but in underwater disturbances of the ocean floor.

Such waves are not uncommon in the Pacific, since it is largely ringed with volcanic islands.

The waves are of two types, one being caused by a subsidence of the sea bottom, the other by an upheaval. In the case of the former, the waters recede, then rush back upon shore violence. With the latter, there would be no subsidence.

Vessels at sea, even directly over the centre of the disturbance, usually are in little or no danger.

Another possible but hitherto untried manner of developing a tidal wave of limited range is the explosion of an atomic bomb under water.

A-bomb experts at Washington, however, laughingly dubbed as fantastic questions about such an origin for the Pacific waves which caused widespread havoc recently.

Some scientists believe that in the Pacific, where the tides are still, where the atom charge will be detonated slightly beneath the surface, a wave of as much as 100 feet may be developed within the 21-mile long, shallow lagoon. They said such a wave would be entirely localized and would not damage the fringing barrier reefs and islands surrounding the lagoon.

The proposed third test, where the bomb is to be exploded at a depth of several thousand feet, probably will produce little wave action of any sort, experts predict.

Postates were not used as food in Europe until 100 years after their discovery in South America.

Sounds Startling

DENVER.—When the telephone rings in the chaplain's office at Buckley's Field, the soldier who answers it says: "Chaplain's office—Saint Peter speaking." He is Lt. Paul L. Peter of Omaha, Neb., a chaplain's assistant.

To Feed The Package Bees At Once On Arrival

Importers of package bees should be sure to have all the necessary equipment ready to house and feed the bees when they are finally placed in milk.

The cages on their arrival

should be set aside, fed with

thin honey or sugar syrup

brushed or sprayed on the screening.

The bees will soon become quiet and may be transferred to their hives immediately if the weather is dull; or, if warm and bright, postpone the move until late afternoon or evening, thus reducing the danger from drifting.

The new colonies should be fed liberally until they are well established and are able to secure enough for their needs from the spring flowers. Once the all foundation is used, more food will be required as the bees need sugar for the manufacture of wax.

Established beekeepers will have spare comb containing pollen and these should be used in the package cages until the bees are found to be quiet, unless there is no delay to a queenless colony.

A beekeeper entitled to obtain sugar should write to the Provincial Apiarist of his province to secure the special permit well in advance of the time the packages are due to arrive.

Lin Queen Elizabeth Ducked For Second Time In Dark

The Queen Elizabeth completed a double record recently when, for the first time in her six years career, she docked at Southampton in the dark—a tricky job for so huge a vessel. The liner had been held up because the tugboat which had been sent to meet her was put up by her master, Captain C. M. Ford, when at the start of the voyage he brought the liner out from New York without assistance because of the tugboat strike in the port. On arrival at Southampton, Captain Ford said the liner behaved perfectly on both occasions.

The sweet potato is an edible member of the morning glory family.

SAVES REGINA SCOTS FACE

Dancing teacher Marilyn Whited is the answer to the Scots' prayer of safety. All set to celebrate Robbie Burns day last January, Regina Scots couldn't find anyone qualified to dance the Highland Fling. An "importation" filled the bill temporarily, but Marilyn, a Regina citizen, now is taking lessons in highland dancing. And she'll teach others.

Powerful Rocket

Deadliest Thing Ever Fired From Airplane Says U.S. Colonel

The United States war department removed the veil of secrecy around "Tiny Tim," a powerful rocket which an army spokesman said is "by far the deadliest thing ever fired from an airplane."

Col. Donald B. Diehl, commanding officer of the Dover Army air field, said the rocket "can sink almost anything that floats." It has driven holes all the way through a light cruiser from side to side," he reported. "It goes through a destroyer as if it were a piece of paper."

As far as Ontario's record since compulsory pasteurization was introduced that city in 1915, the Toronto Hospital for Sick Children reports that not one case of bovine T.B. from Ontario has been recorded on the hospital's admitting records in 30 years. The hospital's records further that not one case from elsewhere in Ontario has been admitted during the last three years. Ontario has had a compulsory pasteurization law, which is 99 per cent effective since 1938. It is the only Canadian province with such legislation on its statutes.

A Double Record

Liner Queen Elizabeth Ducked For Second Time In Dark

The Queen Elizabeth completed a double record recently when, for the first time in her six years career, she docked at Southampton in the dark—a tricky job for so huge a vessel. The liner had been held up because the tugboat which had been sent to meet her was put up by her master, Captain C. M. 2 lbs. soft butter

1 cup chopped leftover meat

2 cups flour

4 tbs. Magic Baking Powder

4 tbs. shortening

1 cup milk

1/2 cup milk</

DAIRYING LOOKS AHEAD

In the opinion of D. H. McCallum, Dairy Commissioner, the cow will play an important part in the future agricultural progress of this province. With the interests in a more permanent type of agriculture for the conservation of soil fertility and the control of weeds, crop rotations and legumes will increase in favour. When it comes to converting live stock feeds into food for human consumption the dairy cow will be on top of the list. Mr. McCallum, given a given quantity of feed she can produce four times as much as a steer.

With reference to the maintenance of a profitable foreign market, Mr. McCallum said that a high quality product will be required, production must be on a scale large enough to assure the producer a satisfactory return, and a continuous supply with a fairly even monthly export quantity must be available. To meet these requirements, the production of high quality milk and cream together

with profitable winter dairying will be needed, and the production per cow will have to be increased by cow testing and herd improvements.

PULP AND PAPER PRICES ADJUSTED

Following examination of operating results in the pulp and paper industry, an upward adjustment in price ceilings, averaging about seven cents at the producer level, has been authorized by the Price Board. With the exception of one point, no increases have been allowed in the industry since the inception of the price ceiling. Chairman Donald Gordon pointed out.

Price increases at the consumer level should be comparable although new prices will assist in maintaining high levels of production for domestic and export markets, the Chairman stated.

Colombia is the only nation in South America with both an Atlantic and a Pacific seaboard.

WORLD FOOD EMERGENCY

Starvation threatens in the Far East and hunger in Europe. We are sending food. We must send more. The need is now—until harvest!

We must help feed a hungry world

A serious shortage of food in certain areas of the world was expected, but crop failures in many areas, and lack of distribution facilities, seeds, and tools in others created a food shortage of alarming proportions. Only immediate deliveries of staple foods can sustain the hungry millions.

PRODUCE AND SAVE — MORE

Since 1939, our per capita record of food exports has exceeded that of any other country. Food production has soared. Canadians have eaten well in spite of war. Today, the seriousness of the world's food situation calls for even greater efforts. We can increase our food shipments and still have enough for our needs.

THIS IS WHAT WE CAN DO

We can ship more WHEAT, FLOUR, MEATS, CHEESE and EGGS if as great quantities as possible are made available for shipment during the next four months.

PRODUCERS! — DELIVER TO MARKET.

CONSUMERS! — BUY LESS OF THESE FOODS — BUY ONLY FOR IMMEDIATE NEEDS — WASTE NOTHING — PLANT A GARDEN — SUBSTITUTE VEGETABLES FOR AS MANY OF THESE VITAL FOODS AS YOU CAN.

This will increase supplies at storage depots, thus freeing additional needed foods for the world's hungry. There can be no permanent prosperity for us . . . or anyone . . . while hunger and despair afflict large areas of the world.

Share with the hungry!

Scientists Find Penicillin An Effective Cure For Mastitis

Indications that veterinary scientists have in large measure conquered mastitis, hitherto an incurable disease of dairy cattle estimated to cost Canadian farmers millions of dollars annually, appear in the latest issue of the Canadian Veterinary Review.

An article in this magazine describes how scientists working under the direction of Dr. Charles A. Mitchell, Dominion Animal Pathologist, Dominion Department of Agriculture, by injecting penicillin into each infected quarter have cured approximately six out of every seven cows suffering from mastitis.

Mastitis, or inflammation of the udder, is caused by any of several germs of which Streptococcus agalactiae is responsible for the chronic infectious form of the disease. It frequently destroys the milk-secreting tissue of each infected quarter so that the total output of milk of milk which it contaminates with pus. As alert health authorities prohibit sale of milk from infected quarters, conscientious dairy farmers usually find it profitable to slaughter these cows after more than one-quarter has become diseased.

Among existing control measures is the prompt discovery of infected animals, in which only a veterinarian is competent to diagnose mastitis in its early stages. Once identified, infected cows are placed at the end of the milking line. By this precaution, there is no danger of milk from infected tests being transferred to teats of healthy cows.

As the udder is a sensitive organ, it is predisposed to infection by even minor injury such as is often caused by rough milkers or by the milking machine being left on too long. The udder is also susceptible to chill from cold ground or inadequate shelter in cold weather.

The magazine article describes the cure is written jointly by J. L. Byrne, J.W. Pullin and K. M. Konst, of the Division of Animal Pathology, Science Service, Dominion Department of Agriculture, who are conducting mastitis research at the Animal Diseases Research Institute, Hull, P.Q. They report that only 38 of 266 udder quarters infected with mastitis failed to respond to penicillin. Their recommended treatment consists of two injections each day of 100 Oxford units of penicillin diluted by 100 cubic centimeters of a sterile solution of salt and water and administered at four days intervals with a complete bacteriological examination before and after the series of injections. They describe animals which have responded to this treatment as "reservoirs from which previously normal animals may become infected and recovered animals reinfected", and recommend their slaughter or isolation from the herd.

Commenting on this article, Dr. Mitchell said that the penicillin treatment should be entrusted only to a qualified veterinarian so as to avoid udder infection by other diseases.

JUST OFF THE PRESS

H. J. Mather, Supervisor of Soil Conservation and Weed Control has prepared an attractive Circular on the thistle problem of Alberta. Both scientific and general information is dealt with, and the latest methods of control by cultivation, competitive crops and chemicals, are considered. Circular No. 76, "The Control of Canada Thistle and Sow Thistle in Alberta," can be had on request from the Field Crops Branch of the Alberta Department of Agriculture.

HOUSEHOLD TRACTOR

A new British machine which it is claimed will do more for the housewife than the tractor has done for the farmer was demonstrated in London recently. It is an automatic electric machine that washes clothes without supervision. The double washes need special installation. Its operation is simplicity itself: one kettleful of hot water is sufficient to wash a dinner service for six people. Similarly, eight pounds of clothes can be washed double rinsed and dried in twenty minutes with the minimum of soap powder and attention. In appearance it is a compact, enamelled cabinet two feet square and thirty-six inches high.

What every housewife should know... about SUGAR FOR CANNING

There is a world-wide shortage of sugar. Last year world sugar production was twenty-five percent below 1939. Reasons for the decrease are:

- Destruction of the sugar industries in Java and the Philippines.
- Shortages of labour and fertilizers in many sugar-producing countries.
- Last year's drought in the Caribbean area, especially Cuba.
- Damage to European sugar beet fields.

World sugar supplies are pooled for the benefit of the United Nations, Canada, the United States and Great Britain are allotted an equal share of sugar according to population. Available supplies must also be shared with other countries.

TEN POUNDS OF CANNING SUGAR PER PERSON

This year's canning sugar allowance is ten pounds per person. Instead of special canning sugar coupons, ten additional general "S" coupons are being made available for the purchase of canning sugar.

\$8 to \$12 inclusive became valid on May 2nd; \$17 to \$21 inclusive on July 4th. Each coupon is good for the purchase of one pound of sugar.

The ten "S" coupons for canning sugar are in addition to

the "S" coupons which regularly become valid each month for the purchase of sugar and preserves.

Those who do not wish to do home canning may use the extra coupons to buy commercially packed jams, jellies, canned fruit, etc., or sugar to supplement the regular ration.

The ten "S" coupons for canning sugar need not be used immediately they become valid. You will be given ample notice of their expiry date.

THESE ARE YOUR "S" COUPONS FOR EXTRA SUGAR

VALID MAY 2

VALID JULY 4

Any valid "S" Coupon, including those shown here, may be used to purchase sugar for canning, or the amount stated below of preserves.

The green "S" coupons \$8 to \$12 and \$17 to \$21 are in addition to the "S" coupons which regularly become valid each month for the purchase of sugar and preserves. They are validated to make available enough sugar for home canning or for other household uses.

"S" COUPON CALENDAR

4th April	.. \$5	20th June	.. \$15 and \$16
18th April	\$6 and \$7	4th July	.. \$17 to \$21
2nd May	\$8 to \$12	18th July	.. \$22 and \$23
16th May	\$13 and \$14	15th August	.. \$24 and \$25

ALTERNATIVE VALUE OF ALL "S" COUPONS

1 lb. of sugar	24 fl. oz.	80 fl. oz.	2 qt. or
OR	OR	OR	OR
4 lbs. jam	1 qt. jam	1 qt. jam	1 qt. jam
OR	OR	OR	OR
2 lbs. honey butter	4 lbs. maple syrup	16 lbs. maple syrup	48 lbs. maple syrup
OR	OR	OR	OR
40 lbs. fruit	4 lbs. sugar	16 lbs. sugar	48 lbs. sugar

AMOUNT OF SUGAR USED IN CANNING

Each housewife may use her canning sugar to fit the needs of her particular household. A common method is to allow $\frac{1}{2}$ lb. sugar for each quart seal of canned fruit and $1\frac{1}{2}$ lbs. sugar for each quart of jam or jelly.

SUGARLESS METHOD OF CANNING FRUIT

Many home economists recommend the sugarless method of canning fruit. Sugar can be added during the winter as the fruit is used. If you have not a copy already, write the Department of Agriculture, Ottawa, for "Wartime Canning" pamphlet.

NEW SPRING WHEAT

Cader is the name of a new variety of hard red spring wheat developed by United States agriculturists. It is a cross of the Merit and Thatcher varieties and is particularly suitable for growing in the northern spring wheat region of that nation.

GRAIN FOR PULETS

The results of a series of feeding tests which were commenced at the Dominion Experimental Farm at

Brandon in 1943 show that up to 60 per cent of the total feed may be grain—a mixture of wheat, barley and oats, when a suitable ration is employed—and the birds are of good laying strain. In the case of birds producing less than an average of three eggs per week, the safer plan of feeding is to compel them to eat more grain or more of their feed in the form of dry mash.

Want to get rid of it? Advertise it in the want ads.

RED CROSS MESSAGES TO CONTINENT

Co-operating with the Canadian Red Cross, the C.R.C. International Service now carries a 15-minute weekly program to Austria for the transmission short-wave of 50 free personal radio messages from Canadians desirous to locate missing relatives in that country. Under arrangements previously set up, the C.R.C. is also broadcasting 50-word free messages to Germany, Czechoslovakia and Holland. Messages to Austria, Czechoslovakia and Holland will only be accepted when the names and addresses of the persons to whom the messages are directed are unknown; it is presumed that, where the addresses are known, the present mail and cable facilities are adequate.

In the case of Germany, however, messages will also be gladly accepted for persons whose present address is known, but only until adequate mail or cable facilities are available to Canadian civilians. There will be no charge for these messages which are limited to fifty words, including the name of the sender and the person to whom the message is directed. They must be of a purely personal nature with no reference to public affairs, business or money and must be addressed to a person, not a company or organization. They may be written in the language of the country to which the message is directed, but a translation in English is required on the reverse side of the form supplied by the Red Cross to facilitate their handling. It is important that the last known address of the residence of the addressee be given, even though the sender in Canada may not be sure of the present whereabouts of the relative at the time. Those desiring to send such messages should contact the Red Cross Branch where forms will be supplied.

WHAT CAUSED THE LOW PRICES

An Honourable Member of the House of Commons recently stated that in 1920 the price of wheat was \$2.73½ a bushel, and that one year later the price had fallen to \$1.10, a decline of 57%. The Hon. Member thought that such a great decline in price could not have been prevented if Government Boards would have the exclusive sale of our wheat and other products.

The drop in the price of wheat mentioned is quite correct. The future market however, had no connection with this decline in price as it had to do with the great tidal wave which had just occurred in the Pacific, for during that same 12 months between 1920 and 1921 the prices of all commodities the world over declined on an average 51%, and many commodities fell lower than wheat. Potatoes 84%, cotton 81%, corn 78%, jute 64%, tin 64 p.c., rubber 64 p.c., oil seed 64 p.c., sheep 64 p.c., rice 60 p.c., lead 59 p.c., wool 58 p.c., and flax 57 p.c. It is apparent, therefore, that the great depression which took place during those 12 months was due to deep worldwide forces that had nothing whatever to do with futures markets, and which declines no Marketing Board could ever have prevented. Fluctuations of prices caused by trading on futures markets are quite normal to improve prices, never to depress them, as so many Royal Commissions have pointed out. The remedy for depressions is to correct the bad worldwide conditions, and not to close futures markets which merely register prices and do not make them.

POST SEEDING CULTIVATION

Cultivation after the crop has been sown growing out and destroying annual weeds without delaying seeding of the crop. H. J. Mather, Supervisor of Soil Conservation and Research, advises that in using this method the crop must be seeded at least three inches deep, and then weed out or wire weed out when the first sprout is on the ground. This method has proved very effective on such plants as stink weed and wild mustard, and must be used on all other wild oats, for which special methods are required. Recommendations for wild oats control are outlined in detail in Circular No. 71, a copy of which may be obtained from the Field Crops Branch of the Alberta Department of Agriculture.

RULE FOR SEEDING STUBBLE

Dr. W. H. Fairfield, who was for 40 years superintendent of the Lethbridge Experimental Station, gives a "rule of thumb" plan for farmers to follow in deciding whether or not they should stubble in some wheat this spring. Dr. Fairfield's rule is to take a shovel or a soil auger, go into his stubble field and make a number of test holes. If he finds moisture down two feet he will know he has a fifty-fifty chance of getting a crop. If there is less than two feet of moisture, long experience has shown that the percentages are against him getting a crop.

BEAVER SHIPS RETURN: Canola and the United Kingdom was linked again by the famous Beaver line when the Canadian freighter was docked at Saint John, N.B., in May at the end of her maiden voyage from Liverpool. The turbine fast freighter in making her initial crossing of the Atlantic in less than seven and a half days started her return trip to Canada with her hold full of ships to replace the original five vessels of the Beaver class which were lost during the war. A fine example of the latest developments in marine design and construction, the vessel is well designed and uses a combination of steam and electrical installations. Her propelling unit is turbine-electric, in which steam generated electrical power at high voltage drives the motor which turns the propeller. Electric wheelchairs also assist her in maneuvering. Almost one quarter of the huge cargo carrying space on the Beaverline is reserved for the carriage of live cattle, while "cold-tile" and liquid ice containers enable the ship's officers to keep a close check on the carcasses at all times. Other unusual uses of "war-baby" developments in use on the ship include radar, gyroscopic compasses, the latest type of searchlight and navigation sets. The new wooden vessel was given a rousing welcome upon her arrival at the busy port where she discharged 6,000 tons of cargo, some of it rubber from Singapore, and loaded Canadian farm produce—including meat, eggs and flour—for the United Kingdom. Captain A. G. T. McKeon of St. John who commutes Captain B. P. Grant on the return of the Beaver line to the North Atlantic fast freight service.

FARM MACHINERY PRICES

Effective April 13, maximum retail price ceilings for Canadian made farm machinery and parts were increased by twelve and one-half percent, the War-time Prices and Rent Control Commission.

This increase was allowed after careful study of detailed information filed by the industry beginning some months ago through which it was clearly established that, with the swing over from war production, unavoidable cost increases would no longer be met without an upward adjustment in price to the consumer.

Following are the general categories of machines affected by the order: Planting, seeding and fertilizing machinery; plows; tillage machinery; harvesting machinery; sundry machinery for preparing crops for market or use; farm power machinery; farm wagons and trucks; dairy machinery and equipment; spraying equipment and dusters; domestic water systems and pumps; barn and barnyard equipment; and miscellaneous equipment.

WILL HOLD CONFERENCE ON TOURIST INDUSTRY

Preparations for a tourist rush to Alberta this year are being made by officials of the provincial government, according to information received by the Alberta Motor Association.

A conference of representatives of everyone interested in promoting the industry will be held in Edmonton on May 16, 17 and 18. At this regulation for the licensing of resorts, camp and auto camps will be decided.

Members of the provincial tourist advisory board, Hotel association, A.M.A., chambers of commerce and boards of trade, holiday resort managers and service station owners with many others are expected to attend.

It is anticipated that the number of tourist visitors this year will exceed the record of 1941 when 350,000 came into the province. In that year, 100,000 cars entered Banff and Jasper national parks.

D. E. C. Campbell, director of publicity for the provincial govern-

ment, has left for Ottawa to discuss tourist promotion with federal officials.

Meantime, the A.M.A. is urging its officers to do everything possible to improve facilities to meet the demands of the tourist industry this year.

INCREASED PRICES FOR FARM PRODUCTS

Increased in prices covering farm products is an announcement from the Hon. J. A. MacKinnon, Minister of Trade and Commerce, to cover flax, hemp, sunflower seeds. The price of flax will be \$2.25 a bushel at the head of the lake and at Vancouver for the 1946-47 crop year. This is an increase of 50¢ a bushel above prices. In making the announcement the minister expressed the hope that more flaxseed will be grown this year to meet the world shortage in fat and vegetable oils. The 1946 crop of rapeseed will bring a top price of 6 cents a pound and sunflower seeds 5 cents a pound.

WHO HAS ALL THE MONEY HE WANTS?

Joe Green is a steady worker with a steady job. He has always met his bills. But now, because of sickness, he suddenly finds he is short of ready cash... tomorrow he will go to his bank and arrange a Personal Loan.

You may find yourself in the same position as Joe Green. Anybody may! Personal loans through your bank make it possible for you to anticipate future earnings. This is an essential part of its services.

Such loans may be obtained to meet financial needs of many kinds; to lay in ahead a winter's supply of coal, to pay municipal or other taxes in time to earn the discount, to provide for home repairs, to send a boy or girl to college, to consolidate debts—indeed for any sound reason.

Bank credit runs through all personal life and commercial life. It operates silently and unobtrusively. You take it for granted. That is the way Canadian banking works.

WESTCOTT NEWS NOTES

(Too Late for Last Issue)
With the arrival of fine drying weather combines and threshing machines are busy finishing up what was left from last fall. The grain is very badly discolored or bleached and the mice seem to have done a lot of damage in both the swaths and stocks.

Mr. and Mrs. Gordon Jacobson were here last week and after having spent some time in Vancouver B.C., where they had gone because of the illness of Mrs. Jacobson's step-father Mr. Templeton. We were sorry to hear that there is no improvement in Mr. Templeton's condition.

Mr. and Mrs. Dale Jacobsen and Mr. V. Petelkin of Cranbrook B.C. are spending a few days this week visiting the Jacobsens at Westcott. They say "man's best friend is his dog" and in that case we would like to offer our condolences to the Swantys, who lost their dog recently.

DODGE HOSPITAL BIRTHS

Born at the Didsbury Municipal Hospital to Mr. and Mrs. Gilbert Champayne of Crossfield on Tuesday, April 16, a girl.

To Mr. and Mrs. G.E. Wall of Raven, on Sunday, April 21, a boy. To Mr. and Mrs. Harold Shells on Sunday, April 21, a boy.

Yours truly,
HAROLD RAMSEY, D.C.

WESTERDALE NOTES

The final whist party of the season was held at the home of Mr. and Mrs. W. Herbert Tuesdays last with Miss Shirley Herbert and Mrs. Darol Herbert as hostesses. Five tables of court whist were played with honors going to Mrs. John Cowie and Mr. Sherrill Nelson. Consolation winners were Mrs. Lester Barnes and Mr. Stanley Jackson.

Records show that \$60.75 was raised at the whist parties held during the past three months.

Mr. George Jackson is back on his farm attending to farming operations after spending the winter at the Didsbury hospital.

Spring work has commenced on the farm and the men and farmers have been a busy and hardworking. Miss Irene Longdale has severed her teaching duties at the Westerdale school owing to the illness of her mother. It has been reported that a teacher from Innisfail will take charge for the balance of the term.

A baseball meeting was held at Waterside school for the purpose of forming a baseball league. Names of teams entering are not yet available.

ADVERTISING IS PROFITABLE

Editor, Didsbury Pioneer:

Dear Sir:

I gave you a notice to insert in your paper some time ago for two months. It has produced results. Continue to insert it until further notice.

Yours truly,
HAROLD RAMSEY, D.C.

WEDDINGS

STEED — MUELLER

A lovely double-ring wedding was solemnized at the home of Mr. and Mrs. Robert Mueller, April 3rd when their daughter, Lois Marie, was married in marriage to Bernard Allen Steed of Cleveland, Ohio. Rev. L.N. Hudelson officiated.

Mrs. E. Little played the wedding march and Donna Little was the ring bearer. The bride, who was given in marriage by her father, was chaperoned in an apricot dress with a lace-trimmed sash and she wore a corsage of gardenias and roses. Her sister, Mrs. Henry Zack of Edmonton, was matron of honor. She wore a grey suit with green accessories. The bride's mother chose a frock of grey with navy accessories.

Mrs. Otto Mueller, uncle of the bride, sang "Because," while the minister was being signed.

After the ceremony, delicious buffet luncheon was served to about forty guests. The visiting relatives were Mr. and Mrs. Granite and family of Didsbury. Also Mr. and Mrs. R. Gilmore of Drumheller, and the bride's brother, Harold, of Alberta College, Edmonton.

Mrs. Geo. Sommerville promised the toast to the bride, to which the crowd responded with a hearty "Hooray."

The groom's gift to the bride was a gold brooch and earrings to the best man a ronson lighter, and to the matron of honor a gold compact. He also presented gifts to the helpers and ring bearer.

Following a brief honeymoon the happy couple will reside in Alliance, Ohio. Three Hills Capital.

We are sorry that we have no Burnsides news this week but our correspondent has phoned that the mail man neglected to collect the mail from the box on his rounds this week.

QUEEN ELIZABETH'S
CO-OP MEETING AT ZELLA
SCHOOL APRIL 30

The Queen Elizabeth completed a double record recently when, for the first time in her six years career she docked at Southampton in the dark—a tricky job for so huge a ship. The first "leg" of the record was put in by her master, Captain Ford. On the return voyage he brought the liner out from New York without assistance because of the tugboat strike in the port. On arrival at Southampton, Captain Ford said the liner behaved perfectly on both occasions.

An Empire Scientific Conference

MANY LESSONS in international cooperation were learned during the war, and some have proved so valuable that they will continue to be applied to advantage in time of peace. It has recently been announced that an Empire Scientific Conference, to be opened by His Majesty the King, will be held in London, Cambridge, and Oxford, on June and July of this year. This conference will result in closer cooperation in scientific work which developed during the war. At that time, the British Commonwealth Scientific Office was set up for the purpose of coordinating research in various parts of the Empire and for providing a central bureau for the interchange of opinion with the United States on matters related to scientific warfare.

Many Urgent Problems Now

It is now believed that the scientific problems of peace are no less urgent than those of war, and that it would be advantageous to continue to co-ordinate the work of scientists in all parts of the Empire. The London Times commenting on the forthcoming conference says: "Within the Empire, the scientific problems of peace, both technical and academic, are no less pressing than those of war. There are, for instance, urgent questions of medicine, especially tropical medicine, agriculture, nutritional science and the world fishing industry, while in the more academic field radio communications and cosmic rays present problems which can only be solved by joint efforts in all parts of the globe." It is expected it will be proposed at the conference that the British Commonwealth Scientific Office be succeeded by a similar organization to carry on this important work.

May Be Benefit To Agriculture

Imperial scientific collaboration has been carried on in the past, on a scale less far-reaching than that which developed during the war. One of the most successful examples of the centralization of work for the benefit of the whole Empire has been in respect to agriculture. In 1929 the Council of Imperial Agricultural Bureaux was formed to act as a clearing house for information concerning soil, animal health, forestry and other subjects related to agriculture. It is probable that agriculture will plumb to a large extent from the post-war activity of Empire scientists. This will be apparent at present in increasing world food supplies, in finding new uses for surplus farm products and in many other problems which would no doubt benefit from a co-operative effort at their solution such as was applied to scientific problems during the war.

FLAVOR

THE SECRET OF TASTY MEALS

Flavor makes all the difference between a meal and a tempting, appetizing meal. Make a practice of adding the appropriate flavoring to your cooking and see how quickly "their appetites will respond."

Do You, Too, Suffer MONTHLY FEMALE PAIN

Then try this effective medicine!

Lytia E. Pukham's Vegetable Compound DOES MORE than relieve monthly pain when due to functional periods. It relieves the pain accompanying weak, tired, nervous feelings—of such nature, that Lytia E. Pukham's Compound is one of the best known and most effective medicines of its kind.

We should examine ourselves and learn what is the affection and part we play in the home in this way only can we learn what we honestly are. Mary Baker Eddy.

Praise two dearly loved, or warmly sought,

Endeavors all internal strength of thought. Goldsmith

BELLOW REQUIREMENTS

In a recent discussion, it was pointed out that 214 acres of arable land are required today for each human being adequately fed. Total area of land at present under cultivation is said to be four billion acres. As the population of the world is slightly over two billion, this only allows (theoretically) two acres per person. But India, and only one-tenth more, has two acres per capita compared with eight acres of improved land per capita in Canada.

Vanilla vines are cultivated under trees large enough to afford shade because they cannot stand much direct sunshin.

To Feed Right — Eat Right

Price Control And Rationing Information

Q. How many cans of fruit can I purchase with one sugar-preserves coupon?

A. One sugar-preserves coupon is good for two 20 fluid ounce cans of fruit. If you wish to buy only one can at a time, the grocer may make up the difference with one jar of jam or the proper quantity of any other rationed preserves, such as honey, molasses or maple syrup.

—o—

Q. We are planning on holding a sports day on the 21st of May. Will we be allowed to sell hot dogs and hamburgers?

A. As the day falls on a Friday, you will not be able to sell meat of any kind.

—o—

Q. How many sugar-preserves coupons become valid in April?

A. Three sugar-preserves coupons issued in April \$5 became valid on April 1, and \$6 and \$7 became valid April 15.

—o—

Q. Has the price of butter been increased?

A. On April 1st the price of creamy butter was increased four cents a pound. Prices for dairy butter remain at the same level as before.

TEG BELLE TAKES CROWN.

BETTER TO SHOUT

Little Mabel aged six had a part in the school exercises. She was much pleased and learned her part quickly and said it over loudly and tamely, "I am with the world and plead the cause of the poor and needy," which she shouted so loudly that she could hardly be understood.

Just before leaving for the exercises her mother decided to hear her say the part again and asked her to repeat it more slowly. Then she dictated to her husband that Mabel was saying "and feed the cows. They are poor and need it."

The new Land Girl was doing her best, but she was evidently finding everything on the farm very strange.

Having an incubator explained to her, and being asked if she fully understood it, she put her head on one side and, with a puzzled look, replied:

"Yes, but where does the hen sit?"

Teacher: "Tommy, how many make a few?"

Tommy: "Three or four."

"How many make a dozen?"

"Twelve."

"How many make a million?"

"Very few."

Curtain Has Been Lifted On Background Story Of Sugar Supply In Canada

WHILE German submarines were plying the Atlantic, the background story of Canada's sugar supply and the work of the Sugar Administration of the Prices Board ranked high on the list of official secrets. But during the last session of Parliament, with sugar movements no longer guarded, the curtain was lifted on the various aspects of the sugar picture—importations, domestic sugar-beet production and an accounting of the Sugar Stabilization Fund.

It was revealed that the Sugar Stabilization Fund had by last autumn accumulated a profit of over \$13 million on its transactions. This money is being used to keep the price of sugar in Canada down to its present level despite the rising cost of raw sugar.

During the war years one blow after another battered the sugar supplies of the allied world. The sugar industry was destroyed in the Philippines and in Java. In Europe, the railroads were captured, sugar houses both on the field of battle and in occupied territories. Other countries, such as Australia, Fiji, Trinidad and Antigua suffered a decline in sugar production due to shortages of labor, shipping facilities and fertilizers. World production of sugar plummeted from eight million tons in 1939 to 32 million tons last year only 23 million tons.

In the face of this sugar crisis, the United Kingdom, the United States and Canada, through the Combined Food Board, agreed to a share-and-share alike sugar policy. This allocation of sugar, known as the "ABC" scheme, has been one of the highlights in recent international co-operation, giving sugar to all who need it on a fair basis.

Canadian beet sugar production has climbed to a figure 20 million pounds above the pre-war average. In 1945 we saw sugar rise to 65 million pounds. During the time beet sugar production was rising in Canada it was in the process of falling in the United Kingdom and the United States. All the sugar we produced goes into the world pool and is distributed among the three who expand to get more sugar than our allocation by simply turning out more beet sugar, though naturally any increase we achieve is of benefit to all.

In 1945 we had available for use 930 million pounds of treated sugar, as against 98 million pounds in 1939. Each year the demand for sugar, with increases in population, is going up. In 1940, before the period of sugar devastation got under way, we had 1217 million pounds of sugar for consumption, although the 1935-1939 average was 996 million pounds.

During the overall sugar target for individual sugar users the countries was set at 768 pounds. But each nation is free to distribute that amount as it sees fit amongst consumers, restaurants, industries and institutions. Therefore there may be, and often are, differences in the amounts granted to different types of users in different countries.

No sugar goes to breweries or distilleries in Canada, although a small amount is allocated to manufacturers of grape wine.

Stories of sugar surpluses circulate from time to time. These stories should be weighed in the light of circumstances. Very often a steady increase in production is carried out in a relatively short time and is naturally held on hand until normal distribution is complete. In the British West Indies, the annual production of sugar established a record type, but the sugar crop in Canada is made in the last three months of the year. Furthermore, as much sugar as possible is brought into Canada before water transportation closes, because of the low haulage cost, and this sugar must be stored for monthly consumption.

The fact that we have made 930 million pounds of sugar in Java. The quantity is uncertain and much of it has deteriorated during the years it has been stored.

It has been suggested Canada should buy sugar from Peru. Should we do so we would not be allowed any more sugar per capita than our allocation permits and at present prices we would have to pay double what we are paying now.

Quite Impossible

One Certain Fact Is That Nobody Can "Understand" Knowledge

Atomic energy impresses American scientists so terribly that they call for the abandonment of all research on the subject. They feel that Man cannot be trusted with so dangerous knowledge. This is quite true. The hard fact of human experience is that nobody can "understand" knowledge. The remedy is impracticable. Rather should the terrible facts in their manifesto inspire even more intensive research into atomic energy than its possible dangers. We may not have its destructive power. And let those facts inspire in the statement of all nations a new sense of responsibility. For wars are made by man, and the leaders of men. There is the responsibility, not the scientists', for whatever have and destruction may be caused. London Daily Express.

Is Well-Organized

The Canadian Government is considering sending experts to Australia to study the mercy missions of that country's flying doctors who form a chain of seven main bases averaging a flight a day and cover about 120,000 square miles annually. Such consultations are unique wireless telephone system.

ENDS WEATHER FORECASTING FOR CENTRAL CANADA.—Frank O'Donnell has drawn up his final forecast for Central Canadian weather after working at it for 40 years. Mr. O'Donnell who was born on a farm in Simcoe County, Ont., now plans to retire to a little farm near Newmarket, Ont. He travelled extensively as inspector for the meteorological service, including visits to the Yukon and Alaska, Hudson's Bay, Labrador and Newfoundland. Today weather reports are received three to four times daily from points in the Yukon, the Arctic and Greenland, but "at the beginning of the century the northern limits of the Canadian weather map were Prince Albert, in Saskatchewan, and White River and Ottawa," he stated. Mr. O'Donnell.

Long Occupation

British Troops May Be Kept In Germany Ten Years

Field Marshal Viscount Montgomery said that the British occupation of Germany would last at least 10 years.

Addressing the council of voluntary war workers in the British occupation zone, he said:

"We have got to stay here until we are satisfied that what took place in the last six years can not make us forget the lessons of the long occupation and I would say that there is no possibility of troops going away in the next ten years from now."

The field marshal said that the British Government survived in its dependence without widespread epidemics or food starvation, and the "battle of winter" might be considered won. "The food situation at the moment is worse than it has been at any time since we have been in this country."

PREVENTS FRAUD

LONDON—United Kingdom manufacturers of business stationery quisites have evolved a new device registration for use in shop or factory. This system enables one person to produce simultaneously up to six legal entries, and each entry is automatically worked for future audit and checking, providing security against possible fraudulent alterations.

Pupils of blue eyes contract more in bright light than pupils of brown eyes,

Would Be Useful

British Women Could Go Shopping On Light Folding Motorcycle

A lightweight folding motorcycle suitable for women, dropped by parachute to parachutists during the war, would be very useful for shopping British women.

A new runabout "Corgi", weight 90 pounds, has used motorcycle equipment and has a speed of 33 miles an hour. It runs on a petroil oil motor and is said to do 200 miles to a gallon. It can be folded up from a low chassis to the hands of a rider. The new model, though slightly heavier than that dropped by parachute, is still portable and can be carried in auto, motorcycle, yacht or car and used for small trips or sightseeing.

Production at the moment, like so many other good things being made in Britain, is for export only. Five thousand "Corgis" have already been ordered by the United States and another order for 10,000 are reported to be on the way.

KEEPS ROAD INTACT

A British invention that attracted much attention at the Action Industrial Exhibition recently was a thrust roller to facilitate underground pipe and cable installation without road disturbance. This machine can be operated by one or two men and consists of an accurate alignment of such thrust tube.

Production at the moment, like so many other good things being made in Britain, is for export only. Five thousand "Corgis" have already been ordered by the United States and another order for 10,000 are reported to be on the way.

The oiler item is a golden bottle in the form of an eagle believed to be about 1,400 years old. The King's orb is a ball of pure gold ornamented with diamonds, pearls, sapphires, rubies and emeralds and there are five jewelled swords as well as many lesser pieces.

Plans Are Being Made For More Adequate Protection Of British Crown Jewels

EXPERTS are studying the bomb-damaged jewel house of the 900-year-old Tower of London as the first step toward incorporating ultramodern devices to guard one of the world's greatest treasures—the British crown jewels. Until these devices are installed, including electrically controlled locks and other still secret means of protection, the jewels will remain in the vaults of the Bank of England, to which they were taken for safe-keeping during the war.

The fabuous array of gems and pearls, some of them over 1,000 years old, removed from the tower during the war, many if not all would have been lost or damaged because one of the last buzz bombs landed by the Germans crashed into the jewel house.

Members of the National Jewelers Association, which is advising on protection, have been shown the jewels to enable them to estimate their value. But it is believed that the intrinsic worth of the thousands of diamonds, rubies, pearls, emeralds and other precious stones as well as gold objects would easily top \$50,000,000. Actually, the cost of the royal jewels is symbolically priceless.

The decision to entail every possible scientific aid in rebuilding the jewel house was taken partly because a huge post-war influx of tourists has been expected and as one guard put it, "Security is not regarded as something else to think about."

Also in this country of tradition, no one has forgotten that in 1671 someone actually did steal the crown jewels. Captain Blood, whose audacity won the admiration of King Charles II, and earned him his freedom and a lucrative job instead of the death penalty.

Such robbery is not to be expected if any one tries again, but officers charged with the safety of the jewels are not forgetting they constitute one of the most powerful weapons of the world.

Among the most precious items of the crown jewels are: the Imperial state crown which is set with more than 2,700 diamonds including the "Second Star of Africa," the Black Prince's ruby, a sapphire from the Koh-i-Noor diamond. In the royal treasury, four pearls worn by Queen Elizabeth and innumerable other precious stones. The imperial crown of India has more than 6,000 diamonds and a magnificent 34-carat emerald. The Queen's crown contains the famed Koh-i-Noor diamond. In the royal sceptre, the "Second Star of Africa," the world's largest cut diamond.

The oldest item is a golden bottle in the form of an eagle believed to be about 1,400 years old. The King's orb is a ball of pure gold ornamented with diamonds, pearls, sapphires, rubies and emeralds and there are five jewelled swords as well as many lesser pieces.

An Old Tradition

Alexander Children Will Have Guest At Bidean Ball

Canada's new governor-general, Field Marshal Viscount Alexander, continued a tradition when he and Lady Alexander invited their three children, Prince Charles, 10, and Brian, 6, their baby brother, Henrietta Scott, one of the children's friends with them as a guest.

Nearly every Government House secretary has brought children to have taken advantage of the ideal playgrounds in the rolling land around the big house. The Earl of Athlone and Princess Alice had their only surviving child, Lady May Abel Smith, with them for a time and her three small children were given the whole years with the grandparents.

Princess Patricia, daughter of the Duke of Connaught who held office from 1911 to 1916, was the most famous and popular of the younger residents of Bidean Hall.

The Princess now, Lady Patricia Hobart, has a similar journey ahead of her as she is married in her honor to the Princess Patricia's Canadian Light Infantry, generally known as the "Princess Pats" of Winnipeg, Vancouver and Victoria.

Two children of governors-general may have been born in this country. In 1911, George St. Lawrence Newfield, son of the Earl and Countess of Bessborough, was born in Montreal and named after the great waterway which had impressed his parents on their arrival. Lord Frederick Blawithwood, son of the Earl and Countess of Dufferin, was born in Ottawa in 1873.

Houses For Britain

Sweden Sending Thousands Of Prefabricated Dwellings Ready For Erection

Sweden is sending Britain 5,000 prefabricated houses, half of them for English families. With the exception of British tiles and the thermostat-controlled anthracite range, every bit of the house came from Sweden, even to the front door key.

Each house is a prefabricated specimen of one that is given a span of 10 years or more of 100 years. The first six houses are being erected near Watford by German prisoners. Each house will take two months to build.

WORLD CHESS KING DIES Dr. Alexander Alekhine, 56, world chess champion, died in Lisbon in his sleep. He began competing in international matches when he was 16 and first won the world title in 1927.

New Fuel Gauge

Tells Pilot Exactly Just How Much Gas He Has

All previous known fuel gauges had the disadvantage of being rather inaccurate in operation. This was very dangerous for aircraft in flight because quite often the instrument might register a false reading or fail to indicate when the tank was nearly empty. The pilot could even reach an airfield, the older type of gauge worked on the principle of a float arm resting on the surface of the fuel which indicated how much fuel was available. His difficulty in finding a fuel gauge that straight the reading was, of course, inexcuseable. The new type of instrument developed by a United Kingdom firm is an electric gauge giving a reading accurate to within three per cent, whatever the position of the aircraft in flight and irrespective of temperature. As the new gauge has no moving parts it is uniform and reliable in operation and does not require maintenance. It is such an improvement on former designs that it is being installed on the latest types of aircraft in Britain and the United States.

Star Bright

7101

by Alice Brooks

Star medallion cloth — you'll be starved for time to learn it when you've got the basic idea, but quickly memorized, fast to crochet.

This star design is superbly elegant used for spreads, scarfs, luncheon sets as well as doilies. Pattern 704.

To obtain this pattern send 25 cents in coins (stamps cannot be accepted). Household Art Dept., 175 McDonald Avenue E., Winnipeg, Man. Be sure to plainly print your Name, Address and Pattern Number.
